

LMOL Report for 2018-06-07

Contact: G. Gronoff

LMOL Team: W. Carrion, T. Berkoff, J. Sparrow, G. Gronoff

Operator for the day: T. Berkoff

PLEASE NOTE:

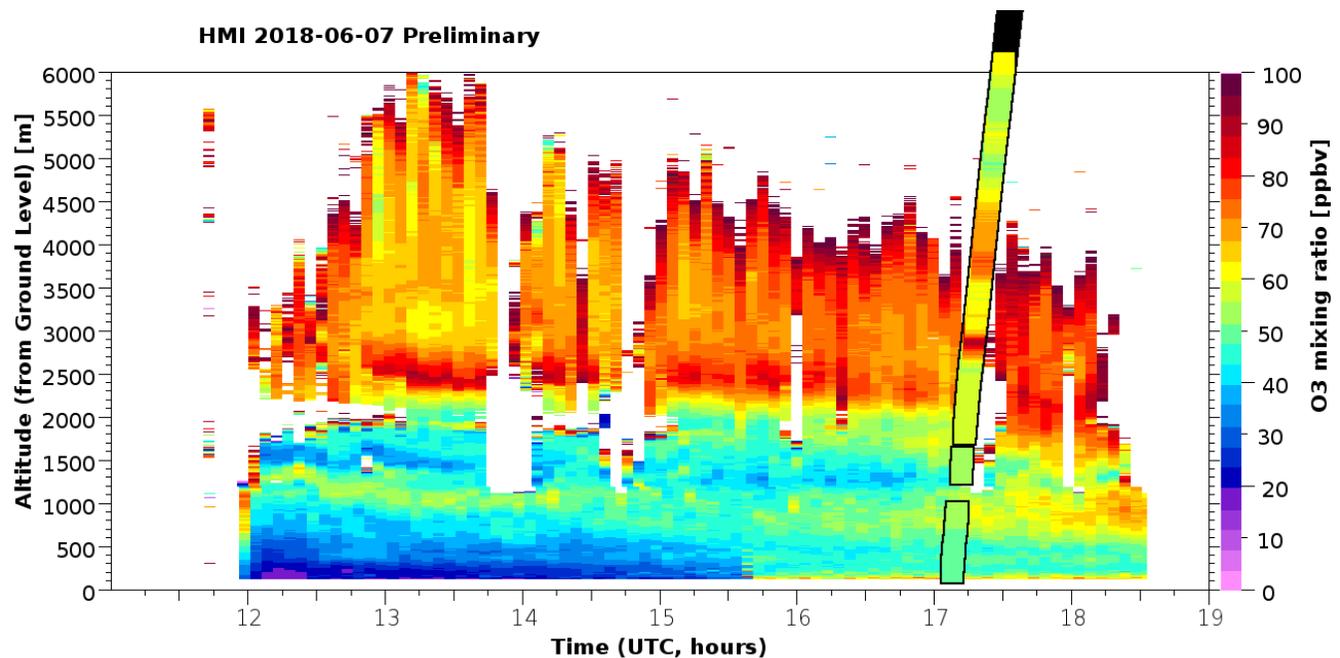

This data is preliminary and should not be used for official business.

LMOL / Lidar

The Lidar performed nominally. Some clouds are affecting the data during the whole day.

Nb: The absence of temperature from the preliminary sonde data prevents using it as atmosphere input for now, increasing the O3 uncertainty.

The data up to 15h30 UTC show lower O3 densities due to a wavelength change (to be corrected in final data). Preliminary sonde data courtesy of L. Niño

LMOL / Weather Station and Ground O3

The POM did not perform nominally. Probably due to the power outages.

The Weather station performed nominally.
